

Important Pocket DNC Backup and Restore Instructions

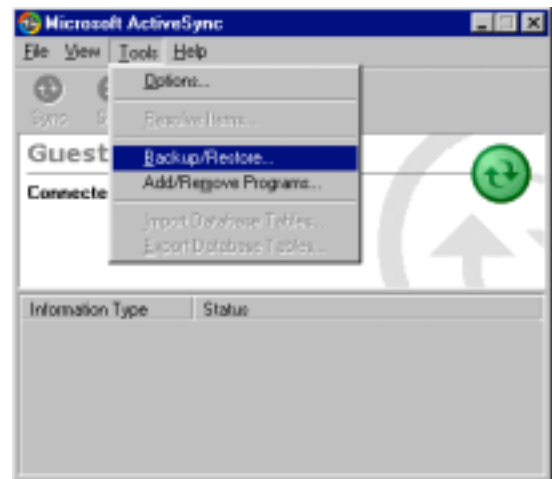

Pocket DNC Backup Instructions

If the Pocket DNC unit is left for a long period of time both the main battery and the small backup battery may be drained. This will result in your DNC software and CNC programs being lost. It is recommend that you backup your software and data on a regular basis by following these instructions.

1. Place the Pocket PC unit into the cradle and ActiveSync will detect it and connect it to your PC and the following window should appear on screen.

2. Click on the Tools menu and then select Backup/Restore option as shown

3. Click on the radio button for Full backup Back up all information and then click on the Back Up Now button.

An entire backup off all your data and software will now be copied onto your office PC. In the event of the Pocket PC losing its memory all your software can be restored from your PC.

Important Pocket DNC Backup and Restore Instructions
